EDUCATION

MILL CREEK HIGH SCHOOL

2022-2026 (Expected Graduation
May 2026)

GEORGIA INSTITUTE OF TECHNOLOGY

B.S. Mechanical Engineering,
Incoming Fall 2026

SKILLS

- Customer Service
- Clear Communication
- CAD (Computer-Aided Design)
- Teamwork
- Soldering & Electronics
- Mechanical Assembly
- Project Management
- Computer Skills
- Google Docs & Sheets
- Microsoft Office

CERTIFICATION

MATH INSTRUCTOR TRAINING

2024
Mathnasium of Dacula

ABOUT ME

Motivated high school senior and incoming Georgia Tech Mechanical Engineering student with experience tutoring mathematics and hands-on engineering projects. Skilled at explaining complex concepts clearly, managing multiple tasks, and maintaining a professional attitude with students and staff. Strong background in calculus, physics, and hands-on engineering projects including CAD design and 3D printing. Known for reliability, problem-solving, and consistent time management.

WORK EXPERIENCE

MATH INSTRUCTOR

Mathnasium of Dacula (2024-2025)

Tutored students from elementary math through calculus, adapting explanations to match different learning styles and skill levels. Simplified complex concepts into clear, step-by-step solutions and provided one-on-one support that improved student understanding and confidence. Managed multiple students at once in a fast-paced learning center while maintaining a focused, positive, and professional environment.

Communicated student progress and challenges with center staff and assisted with grading, learning plans, and assignment completion. Developed strong patience, communication, and time-management skills while demonstrating reliability through consistent attendance and punctuality.

FREELANCE 3D PRINTING & DESIGN

Fiverr (2024-2025)

Created custom CAD models and 3D-printed parts based on client requirements, delivering functional and well-documented designs. Communicated professionally to clarify specifications, provide revisions, and meet deadlines. Managed multiple small orders while maintaining consistent print quality. Demonstrated reliability, attention to detail, and collaborative problem-solving with customers.

3D PRINTER DESIGN

Personal Project (2023-Present)

Designed and assembled a high-speed CoreXY 3D printer from individual mechanical and electronic components, demonstrating strong technical planning and attention to detail. Integrated Klipper firmware with a CAN bus toolhead system and configured motion parameters for reliable performance. Performed mechanical tuning and vibration analysis to improve print quality and structural stability. Diagnosed and resolved hardware, wiring, and software issues independently, showing persistence and problem-solving ability. Managed the project from concept through testing while maintaining organized documentation and consistent progress.
